

SIGNS OF INFECTION: WHAT TO WATCH FOR

- Increased redness or streaking at incision site(s)
- Increased pain
- Foul smelling or pus like drainage
- Fever over 101°F
- Chills
- Wounds that are not healing

If you notice any signs of infection or problems, contact your surgeon, Glacial Ridge Surgical Services, or if after-hours, talk to a hospital nurse at 320.634.4521
